*Claim Rejections - 35 USC § 103*

1. Claims 1-7,9,10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Abrams et al (5,871,517).

The teachings of the Abrams patent are considered to render obvious the method steps of the above claims. Col. 8:40 to col. 9:15 teach that test stimulation is given to the patient and coherence measurements are obtained. Further, col. 13:60-62 teach that adjustments to the stimulation are made, which is analogous to determining stimulation parameters to provide better therapy.

*Allowable Subject Matter*

2. Claim 8 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
3. Claims 11-40 are allowed.

Since a new rejection has been made, this office action has not been made final.
